# EdReports.org Quality Instructional Materials Tool: English Language Arts High School Review Tool

The Common Core State Standards (CCSS), informed by three decades of knowledge around learning, create an unprecedented opportunity to improve student achievement nationwide. However, simply adopting the Common Core and working with teachers on the instructional shifts—as over 40-plus states are doing—will not directly translate into student success. Evidence indicates that instructional materials have a significant effect on student outcomes.<sup>1</sup> And as Harvard’s Richard Elmore argues, to get inside the instructional core and improve learning at scale, it is essential to get quality content into the hands of teachers and students.<sup>2</sup>

If quality instructional materials (e.g., textbooks, curriculum, digital resources and other instructional content) are as critical as the research suggests, local decisions about what CCSS materials to adopt or purchase are now more significant than ever. Publishers are updating their materials, independent curriculum providers are launching and teachers nationwide are generously publishing their own materials for the benefit of others. States, districts and organizations also have been developing and disseminating Common Core-aligned lessons. With so many new and repackaged instructional products being introduced into a quickly changing marketplace, state and district leaders and educators need independent information about instructional materials in order to make informed purchasing decisions and, over time, to move the needle on student performance.

## About EdReports.org

**Our Vision:** All students and teachers in the United States will have access to the highest-quality instructional materials that will help improve student learning outcomes.

**Our Mission:** EdReports.org will increase the capacity of teachers, administrators and leaders to seek, identify and demand the highest-quality instructional materials. Drawing upon expert educators, EdReports.org’s evidence-based reviews of instructional materials and support of smart adoption processes will equip teachers with excellent materials nationwide.

**Our Theory of Action:** Credible information against quality criteria in a quickly changing marketplace helps educators make better purchasing decisions and improve student performance. Identifying excellence and improving demand for credible information will improve the supply of quality materials over time, leading to better student achievement outcomes.

## About This Tool

EdReports.org convened educators to develop this tool to provide educators, stakeholders, and leaders with independent and useful information about the quality of core English language arts instructional materials (whether digital, traditional textbook, or blended). Expert educators will use the tool to evaluate full sets of instructional materials in English language arts against non-negotiable criteria (see Figure 1). This tool builds on the experience of educators, curriculum experts, state processes, and leading rubric developers and organizations – such as Achieve, Inc., the Council of Great City Schools, and Student Achievement Partners, among others – that have conducted reviews of instructional materials, lessons, and tasks.

Whitehurst. *Choosing Blindly: Instructional Materials, Teacher Effectiveness and the Common Core*. (Washington, DC: Brown Center on Education Policy at Brookings, April 2012).

**2** Richard Elmore, in his work on the instructional core, asserts that there are three ways to improve student learning at scale: (1) raise the level of content that students are taught; (2) increase the skill and knowledge that teachers bring to the teaching of that content; and (3) increase the level of students’ active learning of that content. R. Elmore. *Improving the Instructional Core* (Cambridge, MA: Harvard Graduate School of Education, 2008).

To create the evaluation tool, EdReports.org conducted research into the use of commonly-used rubrics, gathered input from educators and English language arts experts during a nationwide listening tour, interviewed professors of English language arts, developers and publishers of materials, and convened an Anchor Educator Working Group (AEWG). The tool may be refined by the AEWG after the first set of reviews is complete.

The tool has three major gateways (see Figure 1) to guide the evaluation process. Reviewers will apply the three gateways sequentially to ensure EdReports.org reports to the field the extent to which materials are CCSS-aligned and usable by educators. Those materials that **meet** or **partially meet** the expectations for Gateway 1 (Text Quality and Complexity, and Alignment to Standards with Tasks and Questions Grounded in Evidence) will move to Gateway 2 (Building Knowledge with Texts, Vocabulary, and Tasks). Only those materials that meet the expectations for **both** Gateway 1 and Gateway 2 will be reviewed in Gateway 3 (Usability Indicators). To support each indicator rating, reviewers document specific evidence from the materials.

# Instructions for Conducting High Quality Reviews

## Using the Tool and Toolkit: Reference Materials to Support Quality Reviews

In addition to the **EdReports.org Quality Instructional Materials Tool: English Language Arts 3-8** reviewers work with the following materials as references:

- *The Common Core State Standards for English Language Arts*, including Appendices (including the Revised Appendix A)
- *Publishers' Criteria for the Common Core State Standards for English Language Arts, Grades 3-8*
- Support materials to identify text complexity and rigor appropriate for each grade
- Evidence Guides (technical documentation support indicating how to collect evidence, where to find evidence and reporting information)

## How to Apply Ratings Using the Evaluation Tool in 4 Steps

### ▶ STEP 1: Review the Criteria and Indicators for each Gateway

- Each Gateway consists of a number of Criteria and Indicators. Criteria in Gateways 1 and 2 refer to Alignment and Quality. Criteria in Gateway 3 refers to Usability.
- Reviewers must provide a rating according to the score options provided for each Indicator and must cite multiple examples of specific, concrete evidence to justify the rating. Reviewers document evidence, including page numbers, lesson names, unit topics, etc., in an evidence collection document.

Figure 2: Rating Sheet Structure

Criterion	Description and Total Possible Score	
Indicator 1 and Description	(Your Rating Score)	(Evidence for Your Chosen Score)
Indicator 2 and Description	(Your Rating Score)	(Evidence for Your Chosen Score)
Indicator 3 and Description	(Your Rating Score)	(Evidence for Your Chosen Score)
...		
Tally Section		
Earned: _____ of 18 points		<input type="checkbox"/> Meets expectations (14-18 points)
		<input type="checkbox"/> Partially meets expectations (8-13 points)
		<input type="checkbox"/> Does not meet expectations (<8 points)

**STEP 2: Rate each Indicator**

- Reviewers will evaluate instructional materials against each Indicator using the appropriate rating scale.
- Evidence Guides** will provide in-depth “look-fors” for each criterion to guide the expert reviewer. Each Rating is supported with evidence from the materials that specifically aligns with the criteria.

<b>Criterion</b>	<p><b>Texts are worthy of students’ time and attention: texts are of quality and are rigorous, meeting the text complexity criteria for each grade.</b></p> <p><b>Materials support students’ advancing toward independent reading.</b></p> <p>Maximum Points: 32</p>
------------------	---

Indicators	Rating	Evidence
<b>1a.</b> Anchor/core texts are of publishable quality and worthy of especially careful reading	0 2 (4)	
<b>1b.</b> Materials reflect the distribution of text types and genres required by the standards at each grade level.	0 2 (4)	
<b>1c.</b> Texts have the appropriate level of complexity for the grade level (according to quantitative analysis and qualitative analysis).	0 2 (4)	
<b>1d.</b> Materials support students’ literacy skills (understanding and comprehension) over the course of the school year through increasingly complex text to develop independence of grade level skills (Series of texts should be at a variety of complexity levels).	0 (2) 4	
<b>1e.</b> Anchor texts and series of texts connected to them are accompanied by a text complexity analysis and rationale for purpose and placement in the grade level.	0 1 (2)	
<b>1f.</b> Anchor and supporting texts provide opportunities for students to engage in a range and volume of reading to achieve grade level reading proficiency.	0 (1) 2	

**STEP 3: Determine the Criterion Rating**

- An overall rating for each Criterion is determined by adding the total points earned from the Criterion’s Indicators.
- Once the total from the Indicators is added, select the Rating (e.g., Meets Expectations, Partially Meets, etc.) based on where the point total falls (see sample below).

**RATING SHEET**

---------------------------------------	--

**STEP 4: Determine the Final Gateway Rating**

- The scoring from each Criterion is added to determine a final Gateway Score. Gateway Scores are determined using the same rating scale as earlier.

<b>Gateway 1</b>	<p><b>High-quality texts are the central focus of lessons, are at the appropriate grade level text complexity, and are accompanied by quality tasks aligned to the standards of reading, writing, speaking, listening, and language in service to grow literacy skills.</b></p> <p>Maximum Points: 42</p>
